P.E. Grades

By: Tyler Priester (4th Grade)

Have you wanted to know how the kids get graded in gym. Well I found out how. Mr. Oberdier grades the report grades on participation, effort, and being properly dressed. He said, "It was not hard to grade them as long as they come prepared, behaved, and show effort." Mr. Oberdier said, "That there are 6 points per week, 50 points per semester for motor development, and 50 points per semester for understanding concepts." He told me what happens when you get a bad grade and just said, "nothing you just get a bad grade." He also said, "The pacer test does not count for a grade." I asked him does effort count as a grade and he said "No but it counts as the participation grade." So now you know how Mr. Oberdier turns in his gym grades.

Tyler and Mr. O

Mrs. Hummel- Preston's Chef

Pizza Read!

By: Ariana Moneskey-Jones (3rd grade)

I have some news sizzling up on Preston's grill about lunch! Mrs. Hummel the chef in Preston's kitchen has been asked a few questions. She has been cooking in Preston's kitchen for one year but six years in other schools. In a scale from one to ten of how much she loves her job she said, "A million because I get to be the boss of my kitchen, I get to cook, and I love seeing the kids." If I've already spiced up your day enough listen to this Mrs. Hummel said that chicken tacos are the hardest food to make because first you have to thaw it out, then put it in the pan, put seasoning on it, and then make sure there is not too much. But the food she loves to make is pizza or chicken nuggets because it's just super easy to make. If one of the students was disrespectful she would correct them in line. This might be a cheesy ending and this might be nacho type of article I tried my best to put a cherry on top.

What's Happening in Second Grade

By: Gianna Jacobs (4th grade)

Have you been wondering what is happening in Second grade? Well I found out first. So far they love their teacher because she is nice, kind, smart, and is helpful. They are learning about adding two digit numbers, three digit numbers, and venn diagrams. Their favorite website to play on is ABCYA. When they are done with their work they like to use the chromebooks, read chapter books, and addition bingo. I asked what they like to do for fun they said, "For fun in class we like to learn new things." They like to get their clip moved up because of the outstanding calls. Their favorite subjects is math and reading. As you can see second grade is doing an outstanding job.

Mrs. Pribonic's Second Grade Class

Thanksgiving

By: Ashlyn Walker (4th Grade)

Have you been wondering what's hanging around in history? Have you been waiting for Thanksgiving for three months like me? Well, I can tell you about the history of Thanksgiving. We celebrate Thanksgiving on every 4th Thursday in November each year. Why is this so? One day in the year of 1620 the pilgrims took the Mayflower to find new land. They did this so they could have a better life. But what was so bad about their life? England broke away from the Roman Catholic Church. They made a new church and called it the Church of England. But every single one of the English people had to be part of the church. Some of them didn't want to be part of the church.

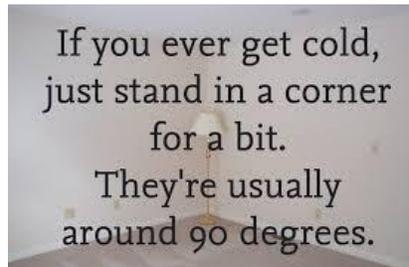

In conclusion they took a ship called the Mayflower to find new land.

They finally hit land and called it Plymouth Rock on September 6, 1620. As they settled a Native American named Samoset came through their village. He greeted them in English. He then introduced the pilgrims to Squanto, another Native American who spoke English. Squanto taught them how to plant corn, fish, he also helped them communicate with the other Native Americans. The pilgrims and Squanto's men were so grateful that they threw a feast that we now call Thanksgiving. We call this holiday Thanksgiving because we are giving thanks like the pilgrims and Native Americans.

Tips and Reminders

By: Brandon Digeroloma
(5th Grade)

- Remember that winter break is coming soon Wednesday December 20th .
- Bring in bottle caps or soda tabs for Miss Hohman for the Akron Children's Hospital.
- If all of us bring in 10 pennies we will have 3,000 pennies for Humble, Texas.

Math

By: James Edward Serdinak (4th grade)

Have you been adding all of the steps up to find out how Miss Hohman grades? When Miss Hohman needs to find the lesson for today she will look at the last lesson completed. When she grades papers she said "I do 1 point for each step and half a point for labels." When Miss Hohman needs to know how a student is doing she looks at tests, quizzes, homework, and class work. Each year the school buys math books for the grades. That's all for fourth grade math. Now have you figured out the equation to Miss Hohman's math.
